

diabetic

AND SENSITIVE FEET SOCKS

RelaxSan® developed socks with exceptional properties for people suffering from Diabetes, Arthritis, Athlete's Foot, sensitive and delicate feet.

RelaxSan® socks are recommended also to any persons having no particular problems and who wish to have always neat and healthy feet thanks to their characteristics which guarantee exceptional beneficial and comfort properties.

In addition, RelaxSan® socks are produced with SPECIAL yarns with many characteristics:

- **COTTON AND X-STATIC® (SILVER FIBRE)**
- **COTTON AND CRABYON® (NATURAL FIBRE MADE UP BY CHITIN/CHITOSANE AND CELLULOSE)**

RELAXSAN DIABETIC

Cotton and X-Static® socks

Cotton and Crabyon® socks

We created socks without compression and with no upper elastic edge **A**, in order to not compress and block blood circulation. The anatomic part **B** let socks to adhere always perfectly so avoiding irritating folds. Tip seam **C** completely flat, avoids any type of irritating abrasion of the tip in contact with toes. Moreover, the particular soft ribs let socks to stay up.

DIABETIC AND SENSITIVE FEET TOESOCKS

Thanks to their manufacturing characteristics and the properties of the yarns, RelaxSan® Diabetic and Sensitive Feet Toe Socks are recommended for diabetics' feet and for those people who suffer from sensitive and delicate feet, arthritis and athlete's foot.

Five-toe designs offer the following benefits:

- 100% seam-free interiors minimize the possibility of any abrasion and irritation of the skin and toes.
- Natural yarn made with cotton and merino wool therefore not allergic to the skin..
- Knitted without elastic – so it will not bind or hinder circulation.
- No friction between toes that can cause irritation and sweating.
- Create a correct space between each toe.
- Maintain constant temperature. Dry in the summer and warmer in the winter especially between the toes.
- Maintain clean and dry space between the toes.
- Maintain (thanks to the silver) bacteria free zone between toes.
- Help to have more correct toe position during normal walking. Help to walk better.
- Help in case of Hallux Valgus.
- Help to prevent the Athlete's foot.
- In case of a nail cut, the sock will avoid damage to the adjacent toe, thus preventing any infection
